TITLE –

RADIOLOGIC CHALLENGES IN COVID -19 AND IN ITS COMPLICATIONS

Name of presenter- Dr Apeksha Dhole

Designation- Professor, PG teacher (BDS, MDS, Ph D  Oral Medicine and Radiology)

Institute- VSPM DC& RC , Nagpur

Mail- apekshadhole15@gmail.com

Abstract-

Since  last year the world has seen havoc due to a corona virus which was never ever expected. The pandemic has affected countries in first wave ,second wave  and now Indians are expecting third wave. During the first wave medical field was in much stress, but radiology  has helped to large extent in the diagnosis and prognosis of patient. Second wave has entered with black fungus. Here also advanced imaging modalities  has helped successfully.

My presentation highlighted the ethical and appropriate mode of radiologic modality. Most of the time inappropriate selection of the diagnostic modality may lead to landing severe complications. So early diagnosis is necessary and the radiology plays vital role.
